Plasma Protein Secretion by the Liver

Edited by

HANS GLAUMANN

T. PETERS

C. REDMAN

1983, 512 pp., \$75.00/ISBN: 0-12-286180-9

This multi-author book is written by leading scientists working in the field of protein secretion by the liver. The book is designed for the cell biologist and biochemist, providing principal concepts of secretion and related phenomenon. Each chapter reviews the field in a particular area. The book provides practical laboratory advice and emphasizes key methodological advances. It covers current methods, basic mechanisms in secretion, synthesis and secretion of specific liver proteins as well as clinical applications.

Pathology of Domestic Animals: Third Edition

**K. V. F. JUBB PETER C. KENNEDY
NIGEL PALMER**

The third edition of this established work updates and appraises current knowledge of the diseases of domestic animals. It provides descriptions and interpretations of the structural and functional changes of each organ and anatomical system, as well as the specific diseases of organs or organ systems.

Divided into three volumes, this richly illustrated work provides comprehensive coverage of the treatment of domestic animal disease from the pathologist's viewpoint.

Volume 1 reviews bones and joints, muscles and tendons, the nervous system, the eye and ear, and skin and appendages. **Volume 2** covers the alimentary, urinary, respiratory, and liver and biliary systems, as well as the pancreas, peritoneum, retroperitoneum, and mesentery. **Volume 3** examines the cardiovascular and hematopoietic systems, endocrine glands, and the male and female genital systems.

Pathology of Domestic Animals, Third Edition has been designed for easy reference, and includes extensive, subdivided bibliographies, detailed indices for access to subject matter, and a full table of contents introducing each chapter. This work will be a bench tool for working pathologists and teachers, and a unique reference for students and researchers in related disciplines.

VOLUME 1

April 1985, 592 pp., \$65.00*

ISBN: 0-12-391601-1

VOLUME 2
